Tibnor REACH statement

REACH (Registration, Evaluation, Authorization, and restriction of Chemicals, EC 1907/2006) is a regulation of the European Union, adopted to improve the protection of human health and the environment from the risks that can be posed by chemicals.

Tibnor does not manufacture or import any chemical substances or mixtures. However, in accordance with REACH article 33, as a distributor of steel and metal products, Tibnor has an obligation to inform its customers if a product contains more than 0,1% by weight of SVHC (Substances of Very High Concern) included in the REACH Candidate List.

The following products in Tibnor´s standard stock assortment contain Candidate List substances with more than 0,1% by weight:

Product	Alloy	Candidate List
Aluminum	2011	Lead
Brass	CW607N, CW614N	Lead
Engineering steel	11SMnPb30, 36SMnPb14	Lead

If Tibnor is supporting customers by sourcing products outside of its standard stock assortment, Tibnor will inform the customers if any of these products contain a Candidate List substance with more than 0,1% by weight.

Under the EU Waste Framework Directive, companies that produce, import or supply articles containing Candidate List substances must submit information on these articles placed on the EU market to the SCIP (Substances of Concern In articles as such or in complex objects (Products)) database. The information in the database helps waste operators in sorting and recycling articles that contain Candidate List substances and supports consumers in making informed choices and considering how the best use and dispose of such articles. Tibnor is working together with relevant suppliers to ensure SCIP notification compliance.

The statements in this declaration are truthful and correct as per the signature date. Tibnor´s policy is that the declaration will be revised twice annually giving cognizance to any changes in products sourced or to legislative changes.
